

### **Freedom of Information Request – Kangaroo Management Data**

I refer to your application under section 14 of the *Freedom of Information Act 1989* (the Act), received by the Environment and Sustainable Development Directorate (ESDD) on 31 January 2014, in which you requested the following documents:

*“details of all figures pertaining to all aspects of kangaroo management in the ACT over a specified period”*

Your complete request is included at [Attachment A](#).

We apologise for the time taken to complete this request. As this letter outlines, information related to this request is held by multiple directorates, and required extensive research to compile. Compiling this information unfortunately led to an unavoidable delay in responding to your request.

You provided your request to both the Territory and Municipal Services Directorate (TAMS) and to the Environment and Sustainable Development Directorate (ESDD). Both Directorates have responsibilities for kangaroo and land management matters and in some cases have joint responsibility for the information which you are seeking.

The Act envisages that an agency will respond individually to a request for information. Due to the information being held jointly between TAMS and ESDD it has been determined a joint decision would be appropriate in this matter.

We are officers authorised to make a decision in respect of a request for information, under section 22 of the Act.

### **Considerations**

The FOI Act provides a right to access a document of an agency other than an exempt document (section 14). The Act however only provides a right of access to information in a documentary form. A range of media are included in the definition of document including sound and visual recordings (*Legislation Act 2001*, Dictionary Part 1). Except for limited circumstances, agencies are not compelled to create documents where these do not exist (Section 16).

The Act also provides that if a decision maker is satisfied that the work involved in giving access to all documents to which the request relates would substantially and unreasonably divert the resources of the agency from its other operations then a request can be refused (Section 23). There are criteria for which the decision maker must have regard in making such a decision. The decision maker does not have to consider the reasons why the information has been requested, in this respect there is no public interest test.

Such matters are balanced by an Agency's obligation to take reasonable steps to assist a person in making a request that complies with the Act (Section 23(5)(a)).

As decision makers we have had to consider whether your request should be refused on the grounds that much of the information that you have requested does not exist of itself in a documentary form

and further that the resources required to find documents that may or may not exist or would substantially and unreasonably divert the resources of both ESDD and TAMS.

### **Decision**

While taking into account the volume of work associated with this request, including the need to create documents where they do not exist, it was considered that by providing a response to your questions, rather than locating documents that relates to the request could enable providing the information required, without unreasonably diverting the resources of both directorates. On this basis a decision has been made to grant your request to provide information and where able, facilitate the provision of information even where information is not in documentary form.

On the basis of this decision, I have assessed responses to 26 specific requests and 9 sub requests you have made. As you will see from the substantive decision not all information has been released to you and a number of exemptions have been claimed.

In considering section 41(1) of the Act, I have decided to exempt from release personal information related to employees of the ACT Government as the disclosure would involve the unreasonable disclosure of personal information about people. For example, in the case of the salary of Mr Don Fletcher, this information is considered personal in nature; however I have decided to provide you with the general salary range of an employee in this position, as outlined in the ACT Government Enterprise Bargaining Agreement. I anticipate that this data will provide you with enough information to support your research without breaching the privacy of Mr Fletcher.

I have also decided to exempt some research information under section 43 of the Act, which relates to business affairs. To release some information related to research could reasonably be expected to reduce the value of that research, and potentially impact the ongoing business of conservation researchers. For this reason some data has been exempt from access.

You will find details of these exemption categories outlined at [Attachment B](#).

### **Review rights**

Our decision is appealable under the Act. This means that if you are dissatisfied with this outcome you have a right to seek a review under section 59 of the Act. This right of review extends to a review of the adequacy of the search for documents undertaken by ESDD. If you wish to seek a review you should write to:

The Director-General  
c/o the Freedom of Information Officer  
GPO Box 1908  
CANBERRA ACT 2601

Email: [ESDDFOI@act.gov.au](mailto:ESDDFOI@act.gov.au)
