## Request for information

(Please provide as much detail as possible, for example subject matter and relevant dates, and also provide details of documents that you are not interested in.)

I request all factual information, including but not limited to data,

Under the Freedom of Information Act 2016 I want to access the following document/s (*required field): supporting the ACT Government's claim variously made publicly and in correspondence with me, most recently in a letter from the Chief Minister dated 25 June 2019, that prior to the 2017 ACT
Budget announcement of changes to the methodology for Chief Minister dated 25 June 2019, that prior to the 2017
Budget announcement of changes to the methodology for calculating rates on unit-titled properties: 'Houses were paying more in rates than units with similar market values and rental returns'.
Please note that I request access to factual information only. If I do not want to access there are documents that include such information but which also the following documents in relation to my request:: include other information, I do not require access to the latter information which may be redacted as being outside the scope of my request. I do not require access to any information that has
 already been published by the Government.

Thank you.
Freedom of Information Coordinator

via email:

## Dear

## FREEDOM OF INFORMATION REQUEST

I refer to your application under section 30 of the Freedom of Information Act 2016 (the Act), received by the Chief Minister, Treasury and Economic Development Directorate (CMTEDD) on 1 July 2019.

Specifically, you are seeking documents held by the ACT Revenue Office (ACTRO) in relation to changes to the methodology for calculating rates on unit-titled properties. In particular, you have requested:
"... all factual information, including but not limited to data, supporting the ACT Government's claim variously made publicly and in correspondence with me, most recently in a letter from the Chief Minister dated 25 June 2019, that prior to the 2017 ACT Budget announcement of changes to the methodology for calculating rates on unit-titled properties: 'Houses were paying more in rates than units with similar market values and rental returns'."

I note that the scope of your request was limited to factual information only.

## Authority

I am an Information Officer appointed by the Director-General of CMTEDD under section 18 of the Act to deal with access applications made under Part 5 of the Act.

I am a tax officer for the purposes of the Taxation Administration Act 1999 (TAA), and also a delegate of the Commissioner of ACT Revenue for the purpose of section 96 of the TAA.

## Timeframes

In accordance with section 40 of the Act, ACTRO is required to provide a decision on your access application by 29 July 2019.

## Decision on access

Searches were completed for relevant documents and 23 documents were identified that fall within the scope of your request. Some of the information requested relates to taxpayer information subject to the operation of division 9.4 (Secrecy) of the TAA.

I have decided to withhold access to 11 of identified documents and grant partial access to 10 documents having determined not to exercise the discretion under sections 96 (Permitted disclosures of a general nature) and 97 (Other permitted disclosures) of the

TAA. Accordingly, I also consider their release to be contrary to the public interest information under Schedule 1 of the Act.

I have decided to grant full access to two documents as I consider their release to be in favour of the public interest.
In accordance with section 54(2) of the Act a statement of reasons outlining my decision is below.

## Material considered

In reaching my access decision, I have taken the following into account:

- the Act;
- the content of the documents that fall within the scope of your request; and
- the secrecy provisions contained in Division 9.4 of the TAA.

## Exemption claimed

As decision maker, I am required to decide where, on balance, public interest lies. As part of this process I must consider factors favouring disclosure and non-disclosure.

In Hogan v Hinch (2011) 243 CLR 506, [31] French CJ stated that when 'used in a statute, the term [public interest] derives its content from "the subject matter and the scope and purpose" of the enactment in which it appears'. Section 17(1) of the Act sets out the test, to be applied to determine whether disclosure of information would be contrary to the public interest. These factors are found in subsection 17(2) and Schedule 2 of the Act.

## Factors favouring disclosure (Schedule 2.1)

Taking into consideration the information contained in the documents found to be within the scope of your request, I have identified that the following public interest factors are relevant to determine if release of the information contained within these documents is within the 'public interest':
(o) disclosure of the information could reasonably be expected to do any of the following:
(viii) reveal the reason for a government decision and any background or contextual information that informed the decision;

This factor is of significant weight, as documents such as briefs and aggregate data derived from sales evidence of the relevant financial years specifically identify what factors and evidence was used to influence the decision of the ACT Government to change the rates caiculation methodology. I believe this information provides significant contextual information to what data was reviewed and what sources were considered by the ACT Government.

## Factors favouring non-disclosure (Schedule 1)

Schedule 1 Section 1.3
Division 9.4 of the TAA contains a secrecy provision as defined in Schedule 1, section 1.3(6) and Schedule 1, Section 1.3(7) of the Act.

Any information that falls within the meaning of information obtained under or in relation to the administration of a tax law' ("taxpayer information") in section 95(2) of the TAA is prohibited by law from disclosure. Sections 96 and 97 allow for disclosure of taxpayer information in certain circumstances, however, I am satisfied that none of these circumstances apply for where documents or information is withheld from release.

Having considered the three documents subject to partial release, 1 am satisfied that the parts withheld comprise of taxpayer information that would allow for the identification of individual taxpayer affairs directly or indirectly. As such, the relevant sections of documents are subject to the secrecy provision in Division 9.4 of the TAA and not for disclosure.

## Schedule 1 Section 1.6

The exempt Cabinet document that has been identified as being within the scope of your request is entirely composed of information that is considered to be contrary to the public interest information under section 1.6 of Schedule 1 of the Act as it is Cabinet information. Under this provision, Cabinet information is exempt from release. The purpose of this exemption is to maintain the confidentiality of the Cabinet process and to uphold the principle of collective ministerial responsibility. This exemption was discussed in The Commonwealth v Northern Land Council [1993] HCA 24; (1993) 176 CLR 604 (21 April 1993). Paragraph 6 of the decision, states that:
... it has never been doubted that it is in the public interest that the deliberations of Cabinet should remain confidential in order that the members of Cabinet may exchange differing views and at the same time maintain the principle of collective responsibility for any decision which may be made.

The Cabinet document falls within section 1.6 of the Act as it is information which has been commissioned by the Cabinet to guide it in its decision making and to assist it in its deliberations. It is therefore exempt from release under the Act.

I note that while Document 3 has the Dissemination Limitation Marker 'Cabinet-InConfidence', I have assessed the information contained in this document, and am not satisfied it meets the criteria to be withheld.

## Charges

Pursuant to Freedom of Information (Fees) Determination 2017 (No 2) processing charges are applicable for this request because the total number of pages to be released to you exceeds the charging threshold of 50 pages. However, the charges have been waived in accordance with section 107(2)(b) of the Act.

## Online publishing - Disclosure log

Under section 28 of the Act, CMTEDD maintains an online record of access applications called a disclosure log. Your original access application, my decision and documents released to you in response to your access application will be published in the CMTEDD disclosure log after 2 August 2019. Your personal contact details will not be published.

You may view CMTEDD disclosure log at:
https://www.cmtedd.act.gov.au/functions/foi/disclosure-log

## Ombudsman review

My decision on your access request is a reviewable decision as identified in Schedule 3 of the Act. You have the right to seek Ombudsman review of this outcome under section 73 of the Act within 20 working days from the day that my decision is published in CMTEDD disclosure log, or a longer period allowed by the Ombudsman.
If you wish to request a review of my decision you may write to the Ombudsman at:
The ACT Ombudsman
GPO Box 442
CANBERRA ACT 2601
Via email: actfoi@ombudsman,gov.au

## ACT Civil and Administrative Tribunal (ACAT) review

Under section 84 of the Act, if a decision is made under section 82(1) on an Ombudsman review, you may apply to the ACAT for review of the Ombudsman decision. Further information may be obtained from the ACAT at:

ACT Civil and Administrative Tribunal
Level 4, 1 Moore St
GPO Box 370
Canberra City ACT 2601
Telephone: (02) 62071740
http://www.acat.act.gov.au/
Should you have any queries in relation to your request please contact me by telephone on 62073478 or email ACTROFOI@act.gov.au.

Yours sincerely

| 13 | N/A | Cabinet Submission under consideration | - | Exempt | Sch 1 s1.6 |
| :---: | :---: | :--- | :---: | :---: | :---: |
| $14-23$ | N/A | Market Data Analysis | - | Exempt | Sch 1 s1.3 |

Data presented to the Treasurer's office on general rates, conveyance duties and property prices by year over 2011-12 to 2015-16.
a. The data on property prices reflects average and median sales prices.
b. Some sales transactions have been disregarded, i.e. transactions worth less than $\$ 100,000$ for units and $\$ 250,000$ for houses, and mixed use buildings.
c. There is no property price data for 2015-16 as yet.

## Out of Scone

e. Not all information is available for all years in all suburbs.
f. General rates increase reflects the full four years. Prior to tax reform general rates revenue increased annually in line with WPI - WPI increases equal 11.7 per cent over 2011-12 to 2015-16. The average rates increase in each suburb will have also depended on changes in AUV/s and changes in the number of properties.

Data presented to the Treasurer's office on general rates, conveyance duties and property prices by year over 2011-12 to 2015-16.
a. The data on property prices reflects average and median sales prices,
b. Some sales transactions have been disregarded, i.e. transactions worth less than $\$ 100,000$ for units and $\$ 250,000$ for houses, and mixed use buildings.
c. There is no property price data for 2015-16 as yet.
e. Not all information is available for all years in all suburbs.
f. General rates increase reflects the full four years. Prior to tax reform general rates revenue increased annually in line with WPI- WPI increases equal 11.7 per cent over 2011-12 to 2015-16. The average rates increase in each suburb will have also depended on changes in AUVs and changes in the number of properties.

Options to adjust the house/unit distribution of general rates (preliminary figures)
To date, general rates increases have been significantly larger for houses compared to units, with the difference most pronounced in the inner north and inner south suburbs. There are two broad options to reduce the disparity between the amount of general rates paid by houses over units.

Chief Minister, Treasury and Economic Development

## To: Chief Mlinister/Treasurer

## Subject: Tax reform proposals for the 2016-17 Budget and

Stage Two Tax Reform - proposed direction for the next five years

## Critical date and reason

1. 8 April to enable Budget Cabinet consideration on 22 April 2016

## Recommendations

2. That you note that we have undertaken analysis on the progress of the Stage 1 Tax Reforms and the distributional impacts of those reforms, with the high level findings set out in Attachment A.

NOTED/PLEASE DISCUSS
3.

4. That you agree to a program of Stage 2 Tax Reforms commencing 1 July 2017, that see changes to the rating methodologies and scale structures (as set out in detail in Attachment C) to better reflect:
a.
 and residential sector;
b. within the residential sector, the changing mix between stand alone houses and units; and
c.

AGREED/ NOT AGREED/PLEASE DISCUSS
5. That you agree to announcing the Stage 2 Tax Reform package in the 2016-17 Budget, including OUT Of Scope a defined level of general rate increases for the next five years, to maintain the momentum of tax reform and to provide certainty and stability to the sectors:
a. For commercial properties:

TRIM:

b. For residential properties
i. Changing the methodology for calculating land tax and general rates for units (to reflect the AUV of the complex), as a one-off increase to the revenue bases in 2017-18;

1. with a one off increase in general rates for units of around 30 per cent, while maintain the increase in general rates for houses at around 7 per cent in this year;
ii. Setting the overall increase in general rates at 7 per cent per annum for each year after 2017-18 ;

2. That you agree to Treasury preparing a Submission to seek Cabinet agreement to these proposed initiatives for consideration on 22 April 2016.

AGREED/NOT AGREED/PLEASE DISCUSS
7. That you agree to Treasury preparing a Budget Paper on Tax Reform, reflecting the Stage 2 Tax Reform package as agreed by Cabinet.

AGREED/ NOT AGREED/PLEASE DISCUSS

## Andrew Barr MLA

/ /

## Supporting Reasoning

8. Treasury has undertaken analysis to identify the progress of the Stage 1 tax reform program to date.

9. In the residential sector the distributional impacts of general rate increases differ markedly between units and houses with increases for houses being significantly
higher than for units over the first four years of reform (refer table 3 in Attachment A).
a. Overall the increase in general rates for houses was $47 \%$ for the first four years of reform compared to $33 \%$ for units.
b. Currently stand-alone houses pay around 80 per cent more in general rates than units - even though they could have a similar rental and market value.
10. There are significant differences in the underlying structure of the respective sectors which means that the ongoing management of tax reform in an equitable manner will be difficult while applying the same rating scales and threshold structures to each sector.
a. As we are four years into the reform program announced in the 2012-13 Budget, we recommend only marginal changes be implemented in 2016-17.
b.

11. This paper provides a discussion of a number of options for implementing these broad directions, including analysis of the budget impacts and the distributional impacts. It provides recommendations for the way forward which will protect the ongoing revenue base whilst providing targeted benefits to particular cohorts. The paper considers commercial and residential sectors separately.

COMMERCIAL

## RESIDENTIAL

27. For the residential sector, we recommend that the next stage of tax reform focus on establishing a more equitable distribution of the general rates burden as between houses and units.
a. This change will be important in positioning the tax base to most effectively capture the revenue raising capacity of the increasingly densifying residential property market.
b. This change would also provide the capacity to redistribute the impacts of tax reform, for both houses and units, between low and high value properties, while retaining broad revenue neutrality of the tax reform program overall.
28. 

## Next Five Years of Tax Reform

## Stage 2 Tax Reform

1. Change the methodology for determining land tax and general rates for units in 2017-18, with a one-off impact on the level of increase in general rates and land tax (predominantly for units) in that year.
2. Establish an overall average increase in general rates for the residential sector of 7 per cent each year for the next 4 years of the reform program.
3. Establish a schedule of conveyance duty rate reductions for each year of the 5 year reform program.
9

## Changes methodology for units

32. We recommend that the calculation of both land tax and general rates change to be based on the total AUV of a unit complex. The total tax determined for the complex would then be apportioned amongst individual units on a basis proportional to their AUV share.
a. Currently general rates and land tax are calculated based on the AUV of the individual unit which means each unit gets the benefit of low marginal tax rates.
b. This initiative would bring the taxes paid by units more into line with those for similar value houses.

Residential Conveyance duty options
37. We recommend that a further 5 years of reductions in conveyance duty rates be announced as part of the Stage 2 Tax Reform program, with a focus on reducing rates applied to low value properties (below $\$ 600,000$ ) to support this segment of the market. Pu Of Scope

## Attachment A - Analysis of Stage 1 Tax Reforms

Reduced reliance on inefficient taxes
The 2012 Tax Reform Plan noted that the share of transaction taxes would be reduced as a share of total taxation, while the share of efficient taxes would increase.

The rollout of tax reform in Stage 1 has lead to a significant reduction in reliance on inefficient taxes and corresponding increased reliance on efficient taxes as shown in Figure A1 below.

Distributional impacts of General Rates Reforms

Table A2 Change in commercial general rates by AUV 2011-12 to 2015-16

Table A3 shows the increases in residential general rates over the first four years of reform. It also illustrates that the distributional impacts of general rates increases in the residential sector differ markedly between units and houses as shown in the table below. Currently stand-alone houses pay around 80 per cent more in general rates than units even though they could have a similar rental and market value.

Attachment C - The next five years of Tax Reform
Proposed Commercial Conveyance Duty reforms put of Scope

The impact of the change in methodology is dependent on:

- The AUV for the building; and
- The number of units.

Combinations of high / low AUV and high / low number of units will be impacted differently.

|  | Current method - rates |  | New method-rates |  |  |  |  |  |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Example | Avg | Aggregate | Avg | Aggregate | AUV-block | \# units | Avg AUV | Avg Change |
| 1 | $\$ 852$ | $\$ 196,761$ | $\$ 943$ | $\$ 217,767$ | $\$ 7,300,000$ | 231 | $\$ 31,602$ | $11 \%$ |
| 2 | $\$ 1,345$ | $\$ 2,689$ | $\$ 1,470$ | $\$ 2,940$ | $\$ 386,000$ | 2 | $\$ 193,000$ | $9 \%$ |
| 3 | $\$ 1,102$ | $\$ 132,184$ | $\$ 1,453$ | $\$ 174,367$ | $\$ 14,520,000$ | 120 | $\$ 121,000$ | $32 \%$ |
| 4 | $\$ 1,298$ | $\$ 11,684$ | $\$ 1,704$ | $\$ 15,334$ | $\$ 1,630,000$ | 9 | $\$ 181,111$ | $31 \%$ |

2016-17 General rates marginal rates

| AUV | Rating Factor |
| :--- | ---: |
| $\$ 1-\$ 150,000$ | $0.2746 \%$ |
| $\$ 150,001-\$ 300,000$ | $0.3900 \%$ |
| $\$ 300,001-\$ 450,000$ | $0.4800 \%$ |
| $\$ 450,001-\$ 600,000$ | $0.5400 \%$ |
| $\$ 600,001$ and over | $0.5750 \%$ |

Example 1:

- The low average AUV means that although the property has a high marginal rate under the new methodology, the increase is distributed across a high number of units. As a result, the average change is relatively low.

Example 2:

- The total AUV of the block is low. The individual units are currently assessed against the second marginal rate and will only be pushed into the third marginal rate under the new methodology. As a result, the change is relatively low.

Example 3:

- Under the current method, each unit is assessed against the lowest marginal rate. Under the new method, the high AUV of the block will be assessed against the highest marginal rate. This results in a significant increase in rates which will be shared amongst each unit. As a result, the average increase is relatively high.

Example 4:

- Under the current method, each unit is assessed against the second lowest marginal rate. Under the new method, the total AUV will be assessed against the highest marginal rate resulting in a high total increase in rates shared across a relatively low number of units.

Market value and change in rates

|  |  |  |  | AUV |  | Estimated Avg rates |  |  |
| ---: | :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  | Avg |  |  |  |
| Example | Location | Units | Avg mrkt value | Avg | Current | New | change |  |
| 1 | Palmerston | 1 | $\$ 410,000$ | $\$ 274,000$ | $\$ 274,000$ | $\$ 1,660$ | $\$ 1,660$ | $0 \%$ |
| 2 | Braddon | 330 | $\$ 575,000$ | $\$ 59,091$ | $\$ 19,500,000$ | $\$ 930$ | $\$ 1,100$ | $18 \%$ |
| 3 | Dickson | 8 | $\$ 500,000$ | $\$ 70,625$ | $\$ 565,000$ | $\$ 960$ | $\$ 1,055$ | $10 \%$ |
| 4 | Belconnen | 2 | $\$ 410,000$ | $\$ 240,000$ | $\$ 480,000$ | $\$ 1,530$ | $\$ 1,710$ | $12 \%$ |

## Comparison of rates for low market value units with high market value houses

The tables below contain information on the lowest market value units in high general rates suburbs, and high market value houses in low general rates suburbs, found from searching allhomes.com.au.

These examples demonstrate it is possible for units to have higher rates than similar, or higher, market value properties; however, this is not likely to be the typical situation.

Units:
$\left.\begin{array}{|l|r|r|r|r|}\hline \text { Suburb } & \begin{array}{r}\text { Lowest market } \\ \text { values found }\end{array} & \text { Property rates } & \begin{array}{r}\text { Suburb median } \\ \text { unit sale value }\end{array} & \begin{array}{r}\text { Suburb unit } \\ \text { average rates }\end{array} \\ \hline \text { Yarralumla } & 379,000 \\ 685,000 \\ 840,000\end{array}\right)$

## Information

a. Cases 1 to 3 illustrate units that have high market values but much lesser rates than houses of lower value prior to the change in methodology. The difference is reduced in $2017-18$. b. Cases 4 to 5 demonstrate the same but for units and houses of similar market values. Cases 6 \& 7 are standalone examples of small unit/townhouse developments.
c. Note while these cases are based on recent property market transactions, these are meant to be illustrative and ? pro
