

Triple Bottom Line (TBL) Assessment Summary

The Triple Bottom Line Assessment is required to be published in accordance with Part 4, section 23 (1)(b) of the Freedom of Information Act 2016

Title of the Submission: 19/374 ACT 5G Revenue Model for Streetlights

Summary of Impacts

- A revenue model implemented in line with the approach proposed would result in carriers who use the streetlight assets paying a one-off application fee per pole in the first year and an ongoing annual renewal charge per pole every year thereafter.
- Once finalised by Government, the fee will be set in accordance with the *Utilities Act 2000*.

Level of impact	Positive	Negative	Neutral
-----------------	----------	----------	---------

Social

Nil impact.

Economic

ACT Government Budget	<ul style="list-style-type: none">• The proposed revenue model would recover the costs to the Government in administering the rollout and may raise additional revenue over time.
Productivity and economic growth	<ul style="list-style-type: none">• 5G is likely to increase productivity growth, and this would result in an increase in gross domestic product per capita by between \$1,300-\$2,000 (in real 2015-16 terms), 10 years after the rollout.

Environmental

Visual quality	<ul style="list-style-type: none">• The rollout of devices on streetlight poles may have a negative impact on the visual quality for some members of the community. The Government will seek to safeguard visual amenity in accordance with the <i>Planning and Development Act 2007 Statement of Strategic Directions</i>.
