Hi Clare

Please find attached references to responses to the two QTON with regards to Energy – solar.

These have been cleared by Jon Sibley and Ben Ponton.

Regards

Ros

Hi Jon and Richard

The Minister's Office has asked for ESDD to provide the answers to the QToN yesterday, 18 March 2014 to be provided to them by 1pm today.

Please see attached.

Can I have the completed response by **11.00 am today**, so that I can get them cleared and sent through to the MO.

Thank you

Ros

Hi Tania and Ros

The Minister's Office has asked for ESDD to provide the answers to the QToN yesterday, **18 March 2014 to be provided by 2pm today.**

- **Energy—solar**

- **MR WALL:** When did the concept of developing large-scale solar in the ACT first become government policy?
- **MR CORBELL:** I assume that Ms Lawder is asking the question in relation to on what date did the first request for proposal go forward under the solar auction process. If that is the question that is being asked, I am very happy to provide that date to Ms Lawder. I do not have it immediately to hand. So I will take the question on notice. But that is how I will answer that question.

I believe the above questions are all of them, but maybe just double check.

Can you please organise this.

Thank you

Clare Guest

ACT LEGISLATIVE ASSEMBLY QUESTION

Question Taken on Notice

Mr Wall - Asked the Minister for the Environment and Sustainable Development on Tuesday, 18 March 2014:

When did the concept of developing large-scale solar in the ACT first become government policy?

Mr Corbell - The answer to the Member's question is as follows:

The first time the ACT Government decided to develop large-scale solar capacity in the ACT was in September 2008 when the Government decided to seek proposals from suitably qualified companies for a capital grant to construct and operate a 30 megawatt solar plant in the Territory.

After the expression of interest process found that the capital grant was inadequate to build and operate the desired large-scale solar capacity, in September 2010 the Minister for the Environment and Sustainable Development announced that a reverse auction process would be used to award a feed-in tariff for 40 megawatts of large-scale solar capacity. This led to the development and passage of the *Electricity Feed-in (Large-scale Renewable Energy Generation) Bill 2011*.

Approved for circulation to the Member and incorporation into Hansard.

Simon Corbell MLA

Minister for the Environment and Sustainable Development
