

19/311 ESA Station Upgrade and Relocation Program – City Station Location on Block 1, Section 86, Acton.

Summary of impacts
<ul style="list-style-type: none">This submission is to update Cabinet on the Emergency Services Agency's (ESA) request to confirm the location of a future ACT Ambulance Service (ACTAS) and ACT Fire and Rescue (ACTF&R) Station in Canberra City.

Key to impacts: Red – negative, Blue – neutral, Green – Positive.

Social

Nil impact.

Economic

ACT Government Budget	<ul style="list-style-type: none">The delivery of a future ACTAS and ACTR&R station in Canberra City will require significant capital investment to design and construct an ACTAS and ACTF&R City Station. Until the due diligence and concept design studies are completed, it is not possible to estimate a full cost of the project. Budget proposals will be put forward for 2020-21 and the forward estimates for Cabinet consideration.
Productivity	<ul style="list-style-type: none">Productivity increases will arise from providing emergency services that meet the needs of a growing ACT population, through use of strategically located, fit for purpose facilities.
Investment	<ul style="list-style-type: none">There is the potential for an increase in investment given the delivery of the City Station is a capital works project and would attract local and interstate investment to build stations.

Environmental

Energy	<ul style="list-style-type: none">New stations and upgrades will be constructed using contemporary energy efficient standards.
